ABOUT ME

IT Engineer with a strong foundation in data analysis and database design. Skilled in Python, SQL, Power BI, and web technologies, with practical experience in data cleaning, exploratory analysis, and building dashboards for actionable insights. Enthusiastic about leveraging technology to solve real-world problems and exploring emerging areas such as Artificial Intelligence and intelligent system.

PROJECTS

Awesome Clinic Healthcare Analytics Dashboard | Power BI 2026

- Built an interactive dashboard analyzing 4,200+ patient records.
- Designed star-schema model with dynamic filtering and KPIs.
- Created DAX measures and cleaned data in Power Query.
- Developed interactive visuals for trends, department performance, and demographics.

GitHub: <https://github.com/itsmk08/healthcare-analytics-powerbi>

Sales Analytics Dashboard | Power BI 2026

- Built an interactive sales analytics dashboard to visualize key sales KPIs and trends.
- Designed a star-schema model to enable dynamic cross-filtering and accurate aggregations.
- Created DAX measures for Total Sales, Sales Growth, Revenue Trends, and sales ratios.
- Performed data cleaning & transformation in Power Query for reliable analysis.
- Developed visuals for sales performance, product/category trends, and time-based insights.

GitHub: <https://github.com/itsmk08/sales-analytics-powerbi>

Data Modeling Project - Relational & Dimensional Design 2026

- Designed a relational database and ER diagrams to model key e-commerce entities and relationships.
- Built a dimensional (Star Schema) model with fact and dimension tables for sales, customer behavior, and product analytics.
- Applied normalization and denormalization to optimize storage and query performance.
- Validated data integrity and analytical use cases through SQL queries for actionable business insights.

GitHub: <https://github.com/itsmk08/online-shop-data-modeling>

IoT-Based Smart Parking System 2025

Final Year Engineering Academic Project

- Developed an IoT-based smart parking system using IR sensors and cameras for vehicle detection.
- Implemented license plate recognition using camera input and OCR techniques.
- Designed parking duration tracking and automated billing calculation using entry and exit timestamps.

GitHub: https://github.com/itsmk08/smart_parking_system

TRAININGS

Business Data Analytics Training Program

Dec 2025 - Feb 2026

Skill Shikshya, Kathmandu, Nepal | 2.5 months

- Acquired practical skills in Python, SQL, Excel, and Power BI for end-to-end data analysis.
- Performed data cleaning, transformation, and exploratory data analysis (EDA) to extract actionable insights.
- Developed dashboards and reports to support data-driven decision making.

TECHNICAL SKILLS

Analytics & Data Management

- Python (Pandas, NumPy), SQL, Excel (Pivot Tables, VLOOKUPS)
- Data Cleaning, Exploratory Data Analysis (EDA), Reporting

Data Visualization & BI Tools

- Power BI (Dashboards, Basic DAX), Matplotlib, Seaborn

Programming & AI Development

- Python, Django, Computer Vision, OCR

Web Development & Front-End

- CSS, Bootstrap, JavaScript

Soft Skills

- Problem Solving, Analytical Thinking, Effective Communication

Productivity Tools

- MS Word, MS Excel, MS PowerPoint

EDUCATION

Bachelor of Engineering in Information Technology

2021 - 2025

Nepal College of Information Technology, Balkumari, Lalitpur

CGPA : 2.93

- Relevant Coursework: Data Structures, Database Management Systems, Software Engineering, Computer Networks, Web Development, Data Analytics, Machine Learning

Intermediate Level (Science)

2018 - 2020

Ambition College, Mid Baneshwor, Kathmandu

CGPA : 3.5

- Relevant Coursework: Physics, Chemistry, Mathematics, Computer Science

Secondary Education

2018

Karnali Education Foundation, BuddhaShanti, Jhapa

CGPA : 3.05

- Relevant Coursework: Physics, Chemistry, Mathematics, Computer Science

LANGUAGE

- Nepali
- English
